### 3. Reasons for the revision

With regards to forecasts for consolidated earnings during the third quarter of the current fiscal year which were announced today, the performance of our business at the consolidated level is proceeding basically as planned despite varying results for each of our business segments.

The main point of the revision to our forecasts for consolidated earnings during the fiscal year ending September 30, 2010 is the revision of consolidated net income to 485 million yen, an increase of 291 million yen from our outstanding forecasts. This revision has been made for the reason stated above in point 1, namely the realization of extraordinary income arising from the share transfer made on July 1, 2010, which will be recorded during the fourth quarter of the current fiscal year.
